

CodeOptimize

From Functional Code to High-Performance Code.

An AI-Powered Code Optimization Platform

The Hidden Tax on Innovation

For the average enterprise, the waste caused by unoptimized code is staggering.

\$255,000+

Monthly Cloud Waste

47%

Wasted Performance

3.2x

Slower Execution

Based on analysis of enterprise-level code deployment.

Intelligent Optimization in Minutes.

SUBMIT

A user shares their code via API or direct upload.

ASSESS

Our AI instantly analyzes optimization potential, completely free of charge.

OPTIMIZE

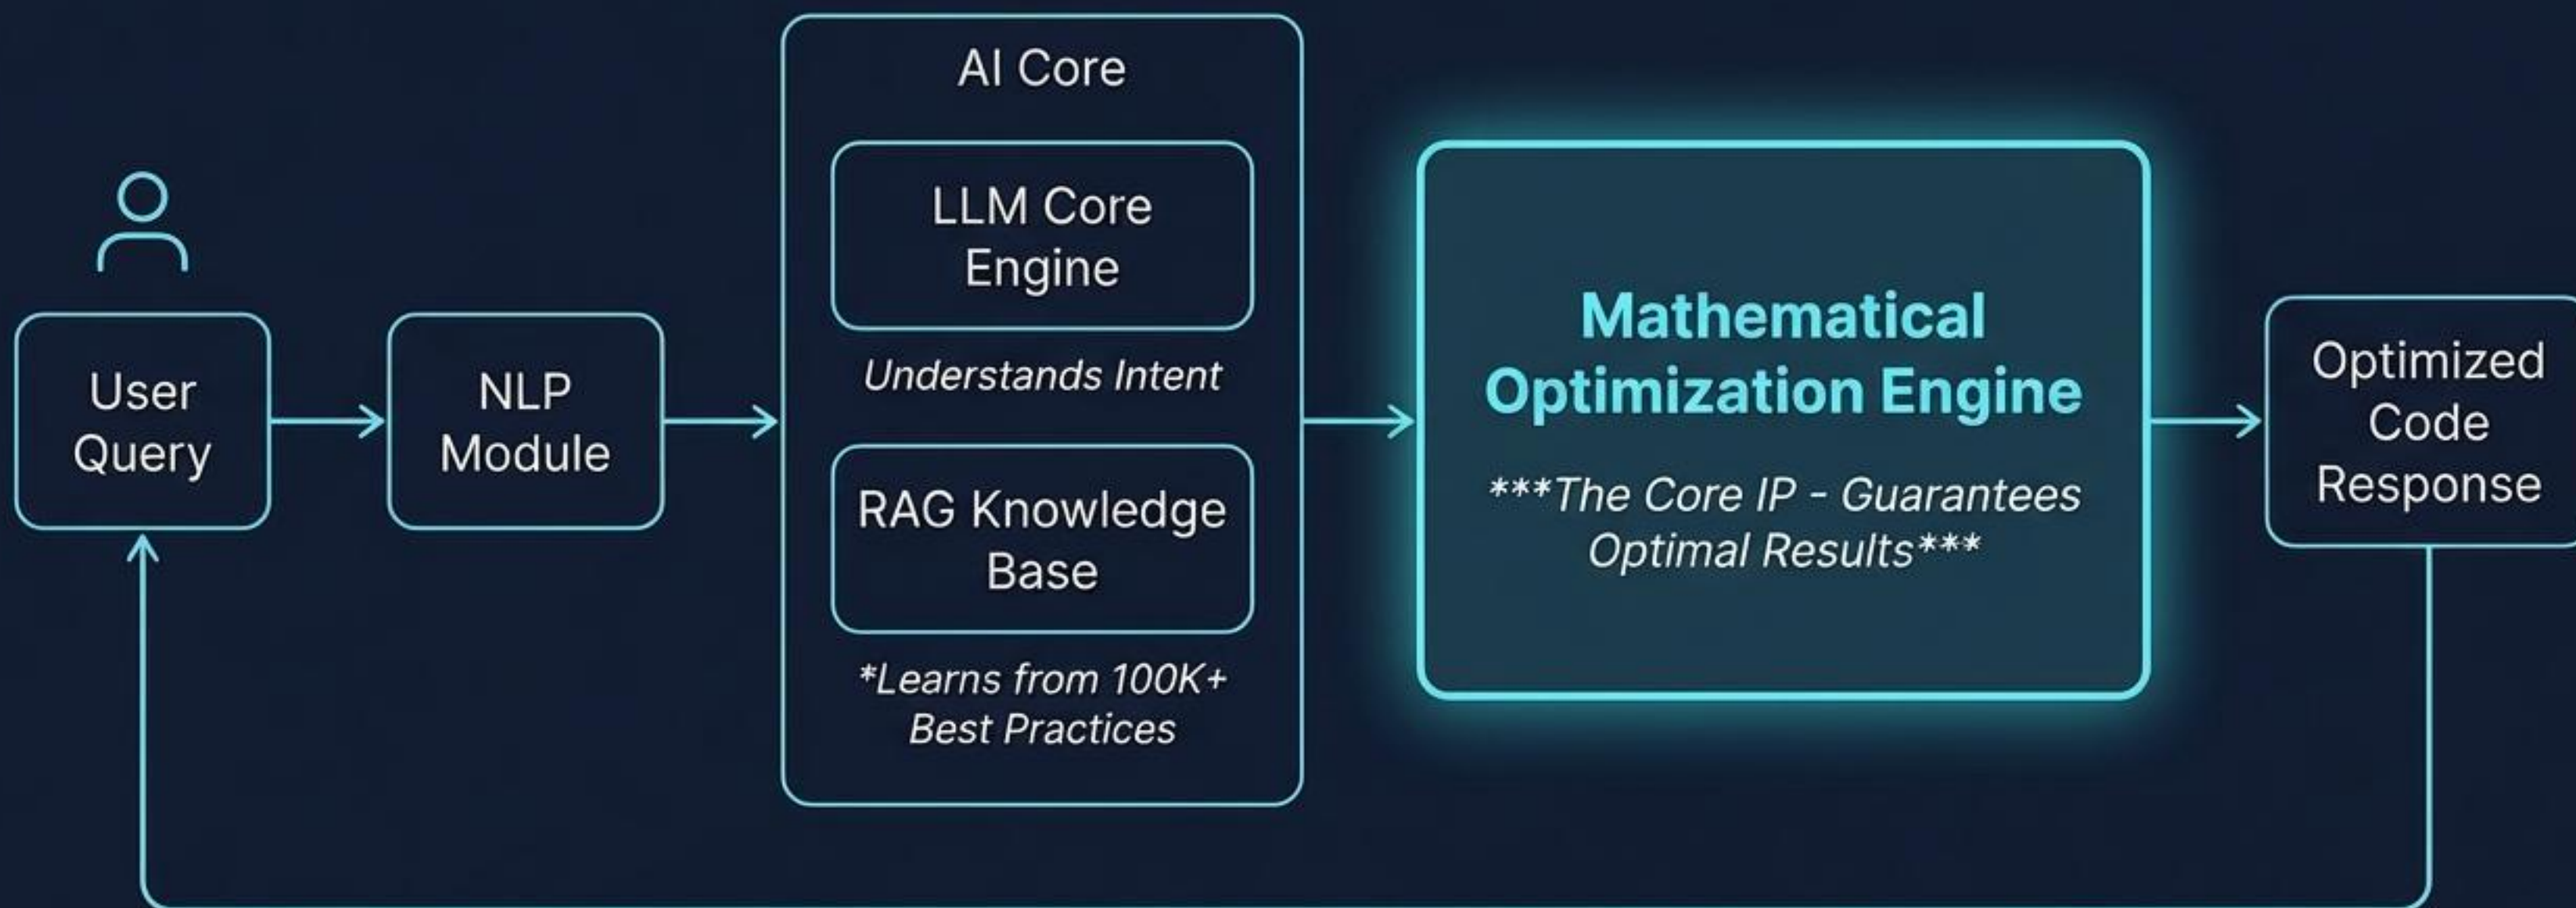

If improvements are found, the user pays with tokens to run the optimization engine.

RECEIVE

The user gets back mathematically proven, high-performance code.

Our Defensible Edge: The Mathematical Optimization Engine

Smarter, Fairer, and Proven.

Mathematically Proven

Achieves 40-60% greater time complexity reduction than competitors who rely on heuristics.

RAG-Enhanced AI

Our model continuously improves by learning from the best software engineering practices, ensuring cutting-edge accuracy.

Token Flexibility

Our success is tied to your savings. Pay only for what you use, with no expensive subscriptions or shelf-ware.

Dual Market Fit

A frictionless pay-as-you-go model for individual developers seeds our scalable subscription model for enterprise teams.

Two Paths to Revenue, One Massive Market.

Bottom-Up Growth

Model: Pay-As-You-Go

- Free to assess code.
- \$5 for 100 tokens.
- One optimization costs 10-50 tokens.

Top-Down Enterprise Sales

Model: Monthly Subscription

- Tiers from \$99-\$999/month.
- Includes token bundles (500-5000/month).
- Team-wide access.

Thank You!
